Dr. Shervin Naderi was voted Best Cosmetic Surgeon by *Bethesda Magazine's* readers in 2011, and named the 2010 Most Compassionate Doctor by the American Registry. Dr. Naderi has patients that travel from as far as Europe and Asia to see him for rhinoplasty and revision rhinoplasty.

His unique and ultra-specialized facial plastic surgery practice is focused nearly exclusively on aesthetic nasal surgery (rhinoplasty) as well as minimally invasive facial injections using Botox® and fillers. He is a national clinical instructor for Allergan (makers of Botox® and Juvederm®) and Medicis (makers of Dysport®, Restylane® & Perlane®), teaching other physicians minimally invasive cosmetic injections. Dr. Naderi is also an examiner for the American Board of Facial Plastic & Reconstructive Surgery.

Dr. Naderi uses digital computer imaging on a 55" LCD screen to show options and potential desired results when it comes to nasal reshaping. "Perfection is unrealistic," he says, "but everyone can have a better nose that is perfect for their face."

Successful rhinoplasty can improve appearance and self-confidence; bad rhinoplasty can adversely affect not only appearance, but also breathing. "I often see patients who have had multiple previous unsuccessful surgeries," says Dr. Naderi. "Some of these patients have gone overseas to save money, while others have spent a small fortune closer to home just to end up with a worse nose than the one they had."

Beyond his skill, artistry and knowledge of the face and nose, Dr. Naderi is a caring physician who often takes the time to talk patients out of unnecessary cosmetic surgery. Dr. Naderi's priorities are safety and risk control, while achieving beautiful and natural looking results with the least downtime and discomfort.
