

Transform Your Skin

Our skin is the most visible sign of aging. Time, gravity, and the sun contribute to fine lines and wrinkles, acne scars and irregular discoloration.

3DMIRACL™ improves:

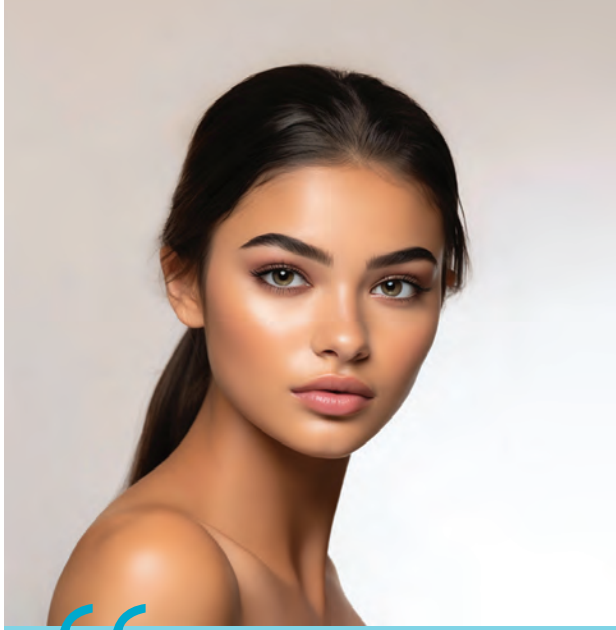

- Sun damage and age spots¹
- Fine lines and wrinkles
- Skin texture and complexion
- Skin brightness

A Revolutionary Anti-Aging Solution

- Less discomfort
- Less downtime
- Safe for all skin types
- Rapid healing

Ask your provider today if 3DMIRACL™ by UltraClear® is right for you. Patient results may vary.

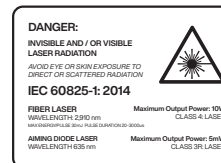

¹Benign Cosmetic Keratosis

The UltraClear® is my new favorite procedure. I've had other lasers, peels, and fillers in the past, but the UltraClear gave great results with a quick 10-minute treatment, no pain, and healed very fast with no problems.”

The UltraClear® Experience

How long will my 3DMIRACL™ treatment take?

Each treatment typically takes 10-20 minutes (full face, neck, and chest).

How much downtime can I expect?

“Social” downtime varies from patient-to-patient. Most patients report they feel comfortable going out in public immediately after treatment.

Downtime also varies depending on your treatment settings selected by your provider.

How often should I get a treatment?

Key physicians across the US recommend waiting 4-6 weeks to allow for natural exfoliation and skin turnover.

Depending on your personalized plan, 3-6 3DMIRACL™ treatments may be recommended on an annual basis.

How painful will my treatment be?

Typically performed with no topical numbing cream, on a pain scale of 0-10, patients report an average of 1.75. The short term “sunburn” sensation post treatment typically resolves 30 mins – a few hours post treatment.

What to Expect Post Treatment

What will I experience post treatment?

Mild redness, occasional swelling and pigment bronzing typically resolves within a couple days. UltraClear triggers natural sloughing and exfoliation of the skin, improving your overall complexion and glow.

For full details, please ask your Provider for your 3DMIRACL™ Pre-Post Care Instructions.
