

## Transform Your Skin

Our skin shows the most visible signs of aging. Time, gravity, and the sun contribute to fine lines and wrinkles, acne scars and irregular discoloration.

### UltraClear® improves:

- Sun damage and age spots<sup>1</sup>
- Fine lines and wrinkles
- Acne scars and scar revision
- Skin brightness
- Skin texture and complexion
- Deep collagen remodeling<sup>2</sup>

## A Revolutionary Anti-Aging Solution

- Less discomfort
- Less downtime
- Safe for all skin types
- Rapid healing

Ask your provider today if the UltraClear skin solutions are right for you. Patient results may vary.

<sup>1</sup>Benign Cosmetic Keratosis

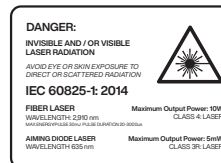

<sup>2</sup>Through a presumed mechanism of action of collagen remodeling

Since I was 15 years old, I always made sure to have makeup on to cover my skin. Now at 55, I am finally comfortable to go out and take pictures with nothing on my skin. This is a top of the line laser treatment.”

## The UltraClear® Experience

### How long will my treatment take?

Each treatment area typically takes 10-20 minutes (full face, neck and chest).

### How much downtime can I expect?

“Social” downtime varies patient-to-patient. Typically patient report use of tinted sunscreen and makeup starting day 4 or 5 post treatment. Signs of treatment are greatly improved within one week.

### How often should I get an UltraClear® treatment?

Key Physicians across the US recommend waiting approximately 6-8 weeks to allow for natural exfoliation and skin cell turnover.

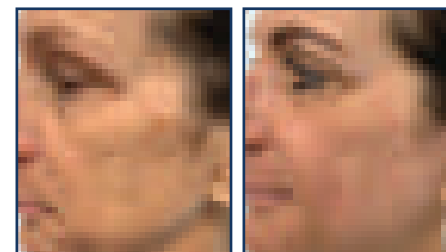

Depending on your personalized plan, 2 - 3 UltraClear® treatments may be recommended on an annual basis.

### How painful will my treatment be?

Depending on the treatment settings selected by your provider, topical numbing cream may be recommended. Overall, patients report increased comfort compared to other ablative resurfacing treatments.

## What to Expect Post Treatment

### POST 1 TX

Courtesy of Joseph C. Gretzula, DO, FAAD

### What will I experience post treatment?

Redness, swelling, pinpoint bleeding and a “sunburn” sensation typically resolve within 3 - 4 days. UltraClear triggers natural sloughing and exfoliation, improving lines, wrinkles, acne scars, discoloration and more.

For full details, please ask your Provider for your UltraClear® Pre-Post Care Instructions.
